Task	Completed (Yes/No)	Time (s)	Difficulties	Observations
Start AITrace Plugin	Yes	11	Needed confirmation after the moderator pointed out the AITrace entry.	Asked whether to click AITrace, then said he would click it.
Identify Code Changes	Yes	8	No	Identified the bottom print statement as replaced by an if/else pass-or-fail check.
Locate and Read an Explanation	Yes	9	No	Described clicking reviewing in the checklist to see what changed and why.
Accept or Reject a Suggestion	Yes	13	A bit confused about the original code.	After comparing the original code to the modified code, he said he would accept.

Data Collection Sheet

Prototype 1 - Floating Window | Second prototype tested

Participant ID: P1

Date: 2026-10-17

Task	Completed (Yes/No)	Time (s)	Difficulties	Observations
Start AITrace Plugin	Yes	4	Asked where the why explanation was; moderator prompted the highlighted area.	Said they placed the cursor on the modified code; the moderator showed the window. Guided startup.
Identify Code Changes	Yes	16	Same code case had already been seen.	Described the highlighted deletion of Not checked and addition of an if/else result check.
Locate and Read an Explanation	Yes	13	Needed a prompt to explore the highlighted area during the introduction.	Said hovering over the modified code opens the what/why explanation.
Accept or Reject a Suggestion	Yes	7	Repeated case; prior exposure may have helped.	Said the change met the requirement and would accept. Button use and state change not verified.

Times are approximate spoken-response intervals, not interface-operation times. They run from the last separately timestamped prompt to the answer end and may include brief confirmation. Yes records a verbal response after guidance; startup is guided, and acceptance does not verify button use or correctness.
