Task	Completed (Yes/No)	Time (s)	Difficulties	Observations
Start AITrace Plugin	Yes	9	Unsure which part was interactive; asked about the minus marker.	Proposed clicking the minus marker; the moderator confirmed and showed the window.
Identify Code Changes	Partial	9	Moderator clarified the task before the answer.	Explained that minus means deleted and plus means added; did not describe the specific code logic.
Locate and Read an Explanation	Yes	6	No	Located the explanation in the popup on the right
Accept or Reject a Suggestion	Yes	10	No	Said he would accept. Also showed worries about long texts being directly replaced.

Prototype 2 - Sidebar | Second prototype tested

Participant ID: P2

Date: 2026-10-17

Task	Completed (Yes/No)	Time (s)	Difficulties	Observations
Start AITrace Plugin	Yes	3	Moderator identified the highlighted AITrace button beforehand.	Said they would click AITrace after the prompt. The moderator displayed the sidebar. Guided startup.
Identify Code Changes	Not confirmed	10	Answer referred to the explanation rather than the changed code.	Described the lower-right what/why panel; accurate identification of changed code was not established.
Locate and Read an Explanation	Yes	5	Checklist and explanation had been demonstrated.	Pointed out the why section. Earlier proposed clicking reviewing to reveal the explanation.
Accept or Reject a Suggestion	Yes	26	Unsure how a long code replacement would be displayed.	Would accept this simple example; asked whether all replaced code would be shown for longer changes.

Times are approximate spoken-response intervals, not interface-operation times. They run from the last separately timestamped prompt to the answer end and may include brief confirmation. Yes records a verbal response after guidance; startup is guided, and acceptance does not verify button use or correctness.
