How much effort did the review require?

2

How useful was the interface for understanding the code changes?

4

How satisfied were you with the review experience?

5

What helped you identify or understand the changes?

I could see where's the difference after the modification. Also, the AI Trace part tells me what the changes are.

What was confusing or required unnecessary effort?

The AI Trace was a little bit confusing. I didn't know what to do with the AI Trace button at first.

What helped you identify or understand the changes?

The highlight part in the coding section tells me what are the changes.

What was confusing or required unnecessary effort?

Nothing

Which layout did you prefer?

Prototype 2

Why? (Quicker access to AITrace? Clearer connection with the relevant code?)

The information in the coding part is just clearer.

Would this approach be useful in your usual programming workflow? Why or why not?

I think so. It's kind of similar to what current AI does in IDE, which is quite useful.
