What helped you identify or understand the changes?

what and why to understand

What was confusing or required unnecessary effort?

no + and - can make me clearly know what has changed especially in a large codebase which can change code in multiple files

Which layout did you prefer?

Prototype 1

Why? (Quicker access to AITrace? Clearer connection with the relevant code?)

prototype 2 has no + and - which can make me clearly know what has changed especially in a large codebase which can change code in multiple files

Would this approach be useful in your usual programming workflow? Why or why not?

I don't use IDE for AI-assisted coding, but it will be helpful if I do.

What one change would most improve AITrace (Optional)?

click on the explanation part to ask AI about the explanation if not uderstood
